More than 2 feet long!!! Other product on Ebay half less than 1.5 feet long!!

Best choice in the market!!

This Kit comes bundled with Chrome Heat Shield Filter !

Our stylish Chrome Heat Shield air filter is the premier air filter designed to create pure horsepower! Its distinctive design maximizes filtration with no reduction in airflow. Its wire mesh prevents large contaminants from entering filter media and provides a strong structural skeleton for the filter. It also provides superior heat protection, which enables more power and smooth flow of air into the intake. Not to mention, the unique chrome design makes a great look with your stylish car!

Our Chrome Heat Shield Filter can be cleaned and reused, with a lifetime equivalent to that of ten normal air filters, thus providing high-performance energy at a much lower prices!

[TOP](#)

We know you're a serious racer. But are you getting all of it? Chrome*INTAKES* will help you upgrade your car at an affordable price! Our full air intake system is designed to replace your restrictive air intake filter.

The whole installation only takes less than an hour on average. Compare to your dull looking stock air intake box, our stylish super intake will help your car engine to breathe better with a high-flow conical air filter system. It comes with a fine-polished heat-resisting aluminum tube that guarantees smoother and colder air to your engine. You will improve your engine performance instantly!

More air comes to the engine means more horsepower. You can expect an average increase of torque (6-12lbs/) and a 5-12 HP boost (results may vary), more power at your wheels when revving higher in your lower gears. You will definitely notice the deep intense roaring sound every time you touch your gas paddle!

So, get what your car deserves!

This intake system comes bundled with:

- 1) 1 of 3" diameter T-306 heat-resisting polished Chrome Intake Tube
- 2) Mounting hardware: Brand New Vacuum hose, Couplers and clamp
- 3) A Washable and reusable Chrome Heat Shield high-flow performance air filter
- 4) Basic Installation Instruction

ADVANTAGES TO USE OUR INTAKE SYSTEM!

- Each product is carefully customized to fit your car
- Unlike other sellers, we only use top quality components in our intake systems
- Our products are designed with a fine-polished aluminum tubing that allows cooler, smoother, and massive air intake
- Uses custom tuned technology to deliver the most efficient and powerful air flow velocity
- Reduces air turbulence within the filter and creates smooth air flow into the throttle body
- Improve tremendously on Low / Mid-range RPM. Within 30 minutes, you will notice the increase of torque (6-12lbs) and a 5-12 hp boost
- Give 50% more filter service area than your stock air box
- Very cool air sucking sound
- This filter is very easy to clean using K&N filter recharger, it is washable and reusable, so you save more money

- All our packaging are safely sealed
- Easy-installation, DIY and save money on installation fees
- Better acceleration and better gas mileage
- Cheapest shipping cost

* Please note that some air intakes may be different from the picture shown above and depends on your car type and year

Our friendly representatives will help you to select an intake system that fits your needs. With an average of less than an hour, you will feel the difference! Have better engine performances and save more gas! It's quick and easy, try our Chrome*INTAKES* system today!
